

Driven by you to drive  
the world.  
Who else but MAN.

MAN Diesel & Turbo has a vacancy in Dubai in the Service department for the earliest start date

## Controls Commissioning Engineer (m/f)

### Tasks

You lead and supervise all commissioning activities during new equipment installation and service, for offshore and onshore installations/sites for all types of rotating equipment/turbomachinery. You will be permanently based in Dubai, but will serve the whole Middle East Region, with occasional international projects as required.

- Check/validate machinery functional logic, including trips/alarms/interlocks
- Commission field instrumentation, calibrations and loop checks as well as motor control centres, motors and control valves
- Implement software modifications in controls systems & visualisation systems
- Validate correct functionality of auxiliary systems (e.g. lube oil, dry gas seals etc.)
- Measure/record/adjust critical machine operational parameters and controls
- Start up and verification of turbomachinery mechanical running behaviour
- Participate and direct site meetings to plan/agree on site activities/work scope
- Provide support and technical advice to customers personnel at site
- Lead and coordinate trouble shooting and problem solving activities at site
- Complete/fill out the respective site documentation and Field Service Reports
- Follow and adhere to the Safety, Health, Environmental and Quality Guidelines and Company Policies

### Qualifications

- BSc/MSc in Controls/Automation/Electrical Engineering or equivalent
- Minimum of 5 years experience in commissioning and trouble shooting of rotating equipment/turbomachinery (preferably turbines/compressors)
- Extensive experience with turbomachinery instrumentation, valves, control systems and auxiliary systems required
- Team player, but also ability to work independently
- Excellent communicator, with good social and intercultural skills
- Flexible, physically fit, willing to travel & work for up to 200 days per year around the world
- Fluent in English (written and spoken), additional foreign languages are beneficial

MAN Diesel & Turbo is the world's leading provider of large-bore diesel engines and turbomachinery for marine and stationary applications. It designs two-stroke and four-stroke engines, gas and steam turbines as well as compressors.

The product range is rounded off by turbochargers, propellers, gas engines and chemical reactors. Customers receive worldwide after-sales services marketed under the MAN PrimeServ brand.

The company employs around 15,000 staff at more than 100 international sites, primarily in Germany, Denmark, France, Switzerland, the Czech Republic, India and China.

MAN Diesel & Turbo is a company in the Power Engineering business area of MAN SE.
